HEAT PIPES

The most reliable air-to-air
energy recovery component

THERMOGAIN HEAT PIPES

The one and only AHRI 1060
certified heat pipe on the market.

**GREAT FOR LABORATORY OR
HOSPITAL APPLICATIONS**

WRAP AROUND HEAT PIPES

Single or double built-in slopes
for better performances and
easy installations

**A MUST FOR ALL
DEHUMIDIFICATION APPLICATIONS**

COMMERCIAL

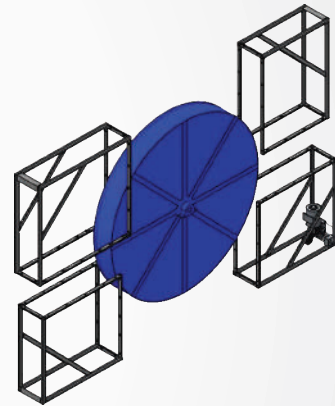

ENERGY RECOVERY WHEELS

The most effective air-to-air energy recovery component

ENERGY RECOVERY WHEEL

Outstanding performances,
high quality construction,
unique Airloop™ sealing system

FIELD INSTALLED ENERGY RECOVERY WHEEL I3R

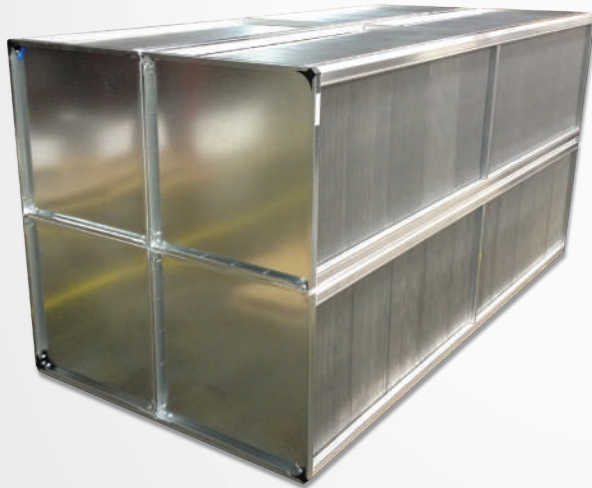

Wheel frames shipped in four sections
to reach the tightest locations.

OUTSTANDING ENERGY RECOVERY AND LOWEST FAN
OPERATING COSTS ON THE MARKET.

COMMERCIAL

SENSIBLE PLATES

The most efficient cross-flow plate
heat exchanger

HOVAL SENSIBLE PLATES

One of the most popular heat recovery components in the industry. Now featuring new spacings that can lead to sensible effectiveness levels exceeding 80%.

Features

Lightweight, easy to install

Operating temperatures up to 392 °F (ST)

Outstanding corrosion resistance (SG)

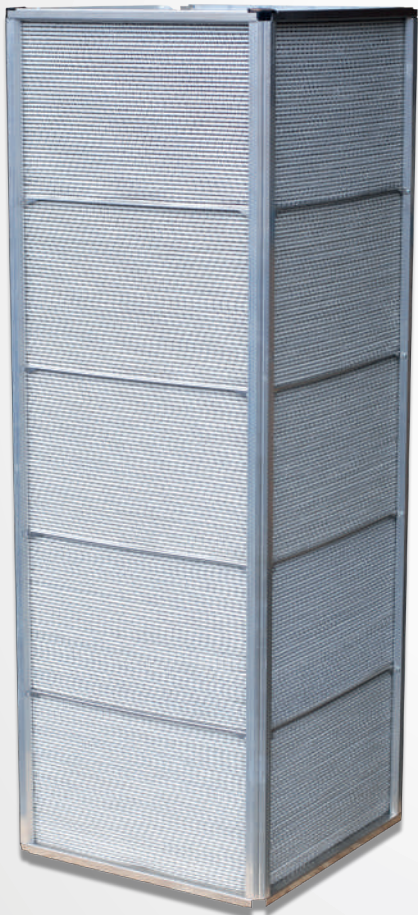

Hoval

Series by Innergytech

COMMERCIAL

ENTHALPY PLATES

The biggest enthalpy plate exchanger
on the market

IPE5 ENTHALPY PLATES

Featuring our next generation Innergy R135 membrane, the IPE5 is now offering greatly improved effectiveness numbers to help you reach ASHRAE 90.1 requirements easily.

A completely redesigned assembly and fully automated production equipment, the pressure drops were reduced by up to 30%.

Features

Solid Commercial Construction

Advanced Sealing Process

Single sections of up to 72" long

Improved Effectiveness

Reduced Pressure drops

COMMERCIAL

CROSS-FLOW CORES

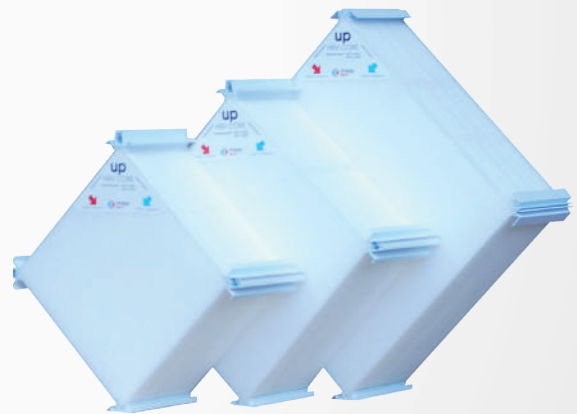

100% interchangeable and highly effective cores

Innergy tech stands as the best partner to OEMs with unique interchangeable and highly effective ERV and HRV core technologies that will meet and exceed the most stringent codes and standards.

CROSS-FLOW ENTHALPY CORE

CROSS-FLOW SENSIBLE CORE

Features

Optional Handle

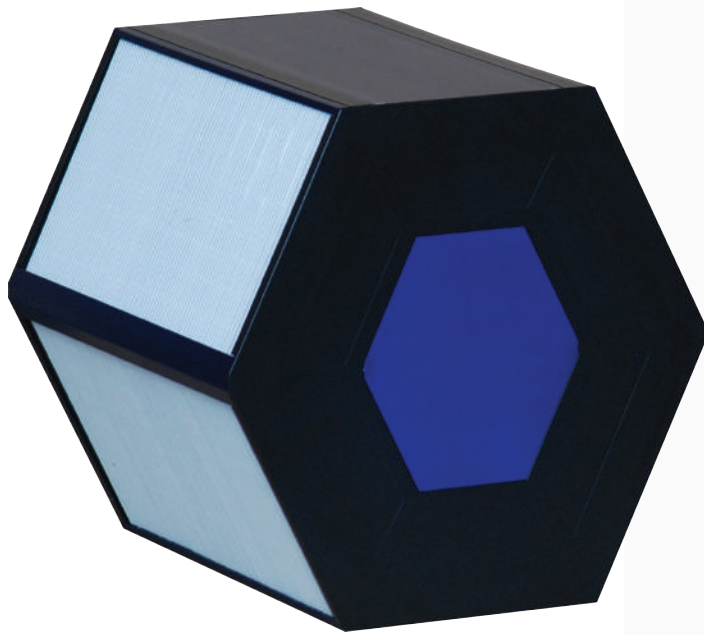

Optional UL900 built-in filter

10", 12" or 13.5" standard square dimensions

Fully adjustable height

RESIDENTIAL

COUNTER-FLOW CORES

COUNTER-FLOW ENTHALPY CORE

The most efficient plate exchanger for residential applications!

Features

High efficiency counterflow

Very high sensible & latent transfer rate

High comfort, good air quality and great energy savings

RESIDENTIAL

WHY ENERGY RECOVERY WITH INNERGY TECH

The most complete manufacturer of air-to-air
energy recovery products in North America.

Widest Product Selection

All Products AHRI 1060 Performance Certified

Professional Engineering Support

Highly Competitive Pricing

Short Lead Times
